

# CSR Report

## People

Reiterating our commitment with surrounding communities, during the month of July the company continued with its infrastructure and municipal roads maintenance to ensure connectivity and free transit in the area. Over 115 kms were given maintenance and constructed around 20 communities.

Continuing with the monthly food basket program, during the month of July over 3000 baskets were distributed among collaborators aligned to our food security and hunger zero commitment.

## Prosperity

During the month of July, Industria Chiquibul extended its commitment towards RSPO certification and its goal to become a certified plantation by 2024. A group of external advisors visited our plantations and together, with our sustainability team, established an action plan focused on people, planet and prosperity to achieve our sustainable goals and identify areas of improvement.

## Planet

For the past years Industria Chiquibul has been a part of the program "Campo Limpio." During the month of July, the company renewed its program certificate in alliance with Agrequima to promote the good management of agrochemical waste and avoid environmental contamination, as well as encouraging the health of its collaborators and surrounding communities. Industria Chiquibul has implemented multiple collection centers where plastic packaging from its agricultural activities is collected, properly managed and washed, and then supplied to Agrequima's collection centers to ensure a proper usage.
