

Planet

During the past month, and as part of our partnership with the National Council of Protected Areas (CONAP), we hosted an intensive forest fire response training program.

During this initiative, our collaborators strengthened their emergency response protocols through hands-on drills led by the Balam Brigade, ensuring an effective protection to the region's natural assets.

Through this effort we reflect our commitment to environmental and biodiversity protection.

Following our ongoing recycling incentives, for the second consecutive year, at Industria Chiquibul we hosted a collection journey for empty agrochemical containers in partnership with the Agrequima.

This initiative ensures the proper disposal of a significant volume of materials, reducing the environmental footprint of our operations and reinforcing our commitment to sustainability.

For this journey, we collaborated together with San Pedro Carchá Municipality, for the collection and transport of plastic containers to their treatment facility, promoting the reutilization of agrochemicals materials and reinforcing our commitment to maintain a clean and safe environment for neighboring communities.

Prosperity

Strengthening our partnership with the Military Order of Malta, during April we delivered a second batch of medicines and help to the community of Samaria.

This initiative have helped communities to close healthcare access gaps and is always received with appreciation by local community leaders.

People

To safeguard the health of our collaborators and uphold international labor standards, during April we conducted mandatory cholinesterase testing for employees handling agrochemicals.

These screenings were supported by Medilab Chisec, ensuring accurate and reliable diagnostics.

Also this month we celebrated the graduation of 22 employees who successfully completed a 40-hour specialized Industrial Rescue course. An advanced training program that strengthens our emergency response brigades and reinforces our commitment to the highest Occupational Health and Safety (OHS) standards.
